

## ADVICE IF YOUR CHILD IS AGED 10 TO 12

- Set some boundaries for your child before they get their first 'connected device' (mobile, tablet, laptop or games console). Once they have it, it can be more difficult to change the way they use it or the settings.
- Tell your child that it's very important to keep phones and other devices secure and well hidden when they're not at home, to minimise the risk of theft or loss.
- Discuss with your child what is safe and appropriate to post and share online. Written comments, photos and videos all form part of their 'digital footprint' and could be seen by anyone and available on the internet forever, even if it is subsequently deleted. Talk to your child about the kind of content they see online. They might be looking for information about their changing bodies and exploring relationships. They also need to understand the importance of not sending other people - whoever they are - pictures of themselves naked.
- Remember that services like Facebook and YouTube have a minimum age limit of 13 for a reason. Don't bow to pressure, talk to other parents and their school to make sure everyone is in agreement.
- Explain to your child that being online doesn't give them anonymity or protection, and that they shouldn't do anything online that they wouldn't do face-to-face.
